Mr Profman Riet

Recycling is the Future

As a means of costs saving measures it has become our priority and passion to continuously engage in projects that promote the idea of recycling

Examples thereof is shown in the following slide

Jacaranda seedpod chandelier - Made of a natural product from a local Jacaranda tree
Dried Jacaranda seedpods are tied to each other

Plastic Barrel Chair - Inspired whiles attending FAB 6 in Amsterdam last year , we made a few of these chairs at our Lab

Cardboard Tube Chair - This was motivated due to the fact that we collected cardboard tubes from local printing businesses

T-shirts - School learners are also making their own custom made T-shirts
